

**Plastic Seats Designed for Residential,
Remodel and Multi-Family Applications**

by:

PLUMBTECH™

Model 211 Elongated

Model 210 Round

What are the Needs and Opportunities for Durable Builder Grade Plastic Seats for Contractors and Consumers?

- The construction and residential markets are always evolving and searching for ways and means to bend the cost curve while maintaining or improving the overall quality of the final product.
- Additionally, consumers and homeowners are more conscious than ever regarding extra styling and new features.
- Market research indicates that as much as 50% of new homeowners are replacing the toilet seats, installed by the building contractor within week of purchasing the home.
- The overwhelming majority of new residential construction toilet seats are being replaced by new homeowners with better quality seats and upgraded features. By far, most of these seats are purchased in retail stores.
- It is clear that one of our goals had to be filling the need for an upgrade quality plastic seat, with premium features, without the premium price.
- Another goal was to design, engineer, and manufacture a plastic seat that meets the needs of both the contractor, and the consumer.
